EDUCATION

Systems Engineering

Universidad de San Buenaventura
9th semester - in progress

LANGUAGES

Spanish - Native

English - Intermediate (B1)

CORE SKILLS

- Cloud architecture fundamentals
- AWS-oriented solutions
- Web application development
- Authentication and authorization
- Database integration
- Problem solving and teamwork

TRAINING

- Cloud Architecture Bootcamp - 159 hours
- English B1 - Smart Academy
- Google: Cybersecurity Fundamentals
- IBM: Developing Interpersonal Skills
- Problem Solving and Decision Making - UCI

CLOUD & SOFTWARE

ENGINEERING STUDENT

AWS-oriented profile | Bogotá, Colombia

PROFESSIONAL SUMMARY

Systems Engineering student in his ninth semester at Universidad de San Buenaventura, focused on cloud-oriented software solutions and AWS fundamentals. He has built web applications with React, TypeScript and Next.js, integrating authentication, role-based access, APIs and databases. Responsible, adaptable and collaborative, with intermediate English (B1) and native Spanish.

Open to internship opportunities in Cloud, AWS, Backend and Software Engineering.

PROJECT EXPERIENCE

Fix-ISO | ISO/IEC 27001 management platform

Cloud-ready web platform for consulting teams to manage client companies, information assets, risks, the Statement of Applicability (SoA) and 93 ISO 27001:2022 controls. Frontend developed with React, Vite, TypeScript, Ant Design, React Router and Axios, with JWT-ready authentication flows, RBAC guards, company context and MSW API mocking.

Gym Tracker | Fitness management web application

Full-stack web application built with Next.js and React. Includes authentication, protected routes, administration, workout and cardio tracking, weight records, shared routines and data visualization. Integrates LibSQL, bcryptjs password hashing, jose JWT handling and a structured API layer.

TECHNICAL TOOLKIT

Cloud: AWS fundamentals, cloud architecture concepts, deployment-oriented design
Frontend: React, Next.js, TypeScript, Vite, Ant Design, React Router
Backend & security: REST APIs, JWT, bcryptjs, jose, RBAC, protected routes
Data & tools: LibSQL, Axios, Recharts, Git, GitHub, MSW, npm, python and Java.

CAREER OBJECTIVE

To obtain an internship opportunity in Cloud, AWS, Backend or Software Engineering, contributing to secure and scalable applications while developing practical experience with AWS services, automation, and cloud operations.
